Profile:

Since beginning my software development journey, I have found that the problem-solving, research, and teamwork necessary to produce robust solutions all fit perfectly with my strengths. I get a lot of fulfillment out of solving a difficult challenge and I always do what I can to learn more and help others along the way.

Projects:

BEHIND THE SEAMS

INDIVIDUAL PROJECT | [VIEW CODE](#)

Behind The Seams is a full-stack web application for tracking and management of sewing projects, patterns, and fabric.

- Built solo in a two-week sprint as a final capstone project
- **ASP.NET Web API** back-end, **SQL Server** database
- **React** application with image and file upload capabilities for users to store digital patterns
- Users are able to track progress and keep notes on their projects, and catalog all of their fabrics and patterns

REPERTOIRE

INDIVIDUAL PROJECT | [VIEW CODE](#)

Repertoire is a web application built using React, targeted towards musicians who like to find sheet music online.

- Built solo in a two-week sprint as front-end capstone project
- Custom **CSS** styling, with some **Material-UI** elements
- **React** application with audio integration, drag-and-drop setlist rearranging
- CRUD functionality for songs added, per-user notes
- **JSON server** used for persistent data store

Education:

UNIVERSITY OF WISCONSIN - STEVENS POINT

Journalism/Communication - 3 Years

NASHVILLE SOFTWARE SCHOOL

Full-Stack Web Development Bootcamp - 6 Months

Skills:

HTML | JavaScript | SQL | React | VueJS | .NET | C# | Git/GitHub
TypeScript | Node.js | Tailwind | API Design | Blazor

Technical Education:

SOFTWARE DEVELOPER/APPRENTICE

Nashville Software School | Software Bootcamp Certificate

An intensive, six-month full-time education in the skills and technologies needed to become a full-stack software developer. Working in a remote environment with ample group collaboration, we focused on the following:

- **Git & Github** version control
- Remote project collaboration
- ERDs, dependency charts, wireframe design
- Developing applications using popular tech stacks that include **TypeScript**, **React**, **HTML5**, **CSS**, **C#**, **.NET**, **SQL**

Professional Experience:

WEB APPLICATION DEVELOPER

Jackrabbit Technologies | 2022-Present

- Work (primarily in **Blazor** and **C#** on a sprint team building a childcare center management platform.
- Develop front-end features with **Blazor** and **Tailwind** in close collaboration with design and product teams.
- Provide backend services and API features to a **Flutter** mobile team using **.NET** and **MS SQL**.

SOFTWARE DEVELOPER

Century Aluminum | 2021-2022

- Work (primarily in **C#** and **React/TypeScript**) to update and modernize proprietary legacy applications used in aluminum production while maintaining original functionality and user familiarity.
- Collaborate with internal stakeholders to collect requirements and produce solutions for industrial and logistical optimization.
- Develop and refine internal development processes and libraries to aid in projects across the development team.
- Research and deploy an **Nx monorepo** for front-end development to standardize code style and testing.

TECHNICAL CONSULTANT/SOFTWARE DEV

Mosaic Consulting Group | 2021

- Work closely with clients to develop API integration solutions between UKG/UltiPro HCM software and third-party vendor software including but not limited to training programs, Outlook, and recruiting/onboarding software - primarily developed with **C#** and **.NET** technologies
- Participate in development of internal solutions with integration of internal and external API sources
- Consult with clients on technical solutions for a variety of HR and business management needs
